LRB Number 13-2401/1	Introduction Number	AB-0374	Estimate Type	Original		
Description						
Deletion of the waiting period for collection of unemployment insurance benefits						

Assumptions Used in Arriving at Fiscal Estimate

Effective 01/01/12, Wisconsin implemented a waiting week for Unemployment Insurance benefits. For every new benefit year, no benefits are payable for the first week a claimant would otherwise be eligible for benefits. The waiting week can be a week in which full or partial benefits are payable. The waiting week does not reduce a claimant's maximum benefit amount.

Repealing the waiting week will increase benefits by approximately 5.3% per year, which averaging over the 5-year business cycle, is approximately \$45 million in benefits charged to taxable employers, or \$48 million including reimbursable employers. Using the Tax Model, this would increase taxes by approximately \$17 million per year on average over the business cycle. More benefits will be charged to employer accounts, which will move employers into higher tax brackets, thus increasing their tax rate and increasing tax revenue to the UI Trust Fund. The average net impact to the UI Trust Fund is a decrease (cost) of approximately \$28 million annually. The impact to the UI Trust Fund is based upon projecting Unemployment Insurance benefits and contributions over a five-year business cycle which includes expansionary and recessionary periods.

Based on the \$48 million total increase in benefits payable, the state government reimbursable employer fiscal impact is estimated at \$254,016 annually and local government reimbursable impact is estimated at \$955,584 annually. The total state and local government reimbursable employer impact is an estimated increased cost of \$1,209,600 annually, affecting all state and local appropriations funding FTE's.

Special Notes:

Since repealing the waiting week may negatively impact UI Trust Fund solvency, it could lead to accelerated FUTA credit reductions if this law were to pass while Wisconsin is borrowing from the Federal government.

Long-Range Fiscal Implications
